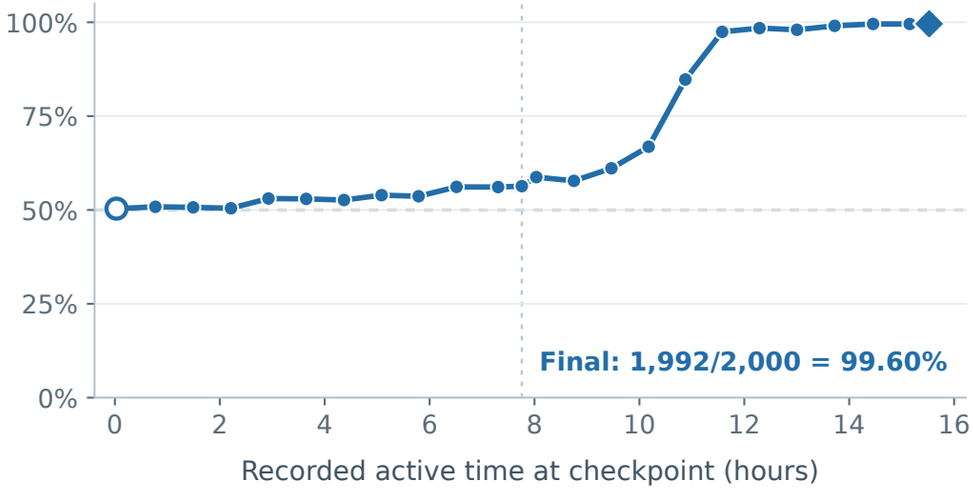
Corrected university continuation · frozen evaluations

24 measured checkpoints, including baseline and update 530 · Final update 1076 · L40S

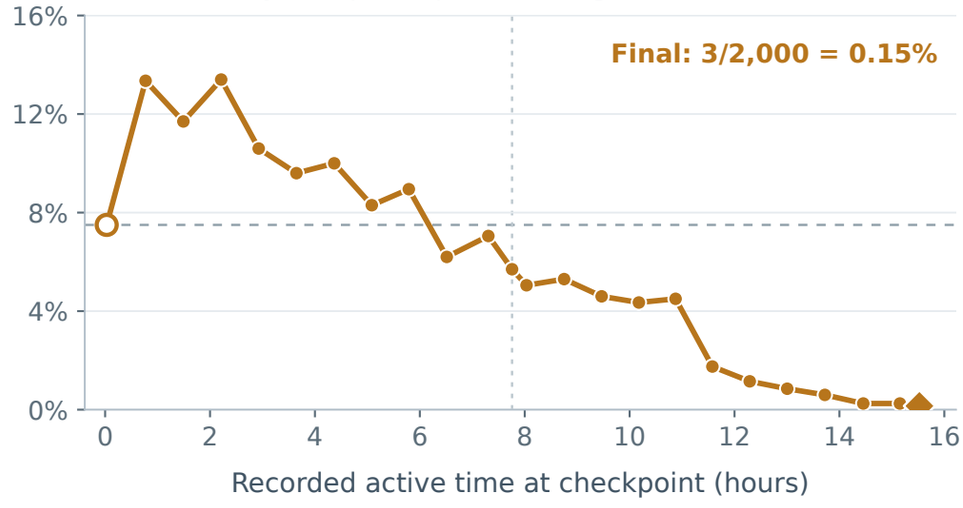
A C_R Receiver accuracy

2,000 university examples · full percentage scale



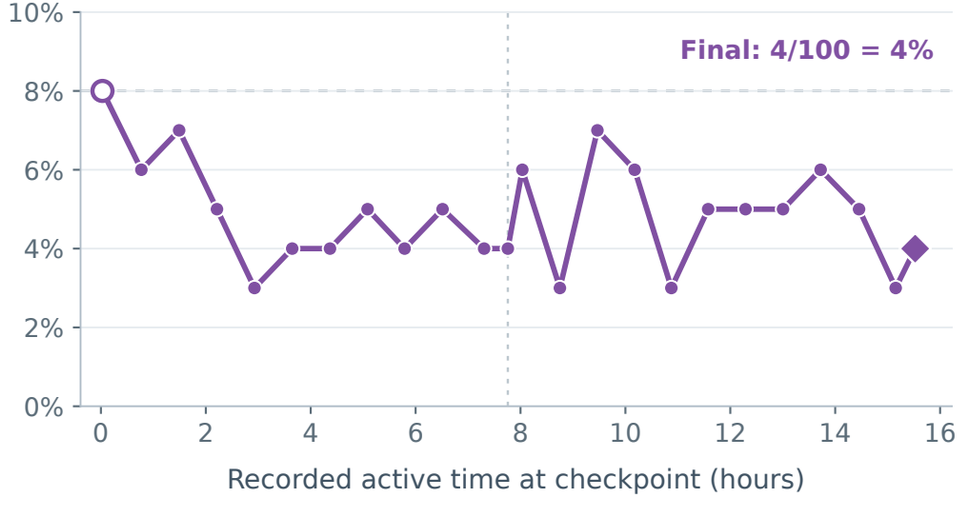
B C_I Static-observer flags

2,000 university examples · operational flag rate



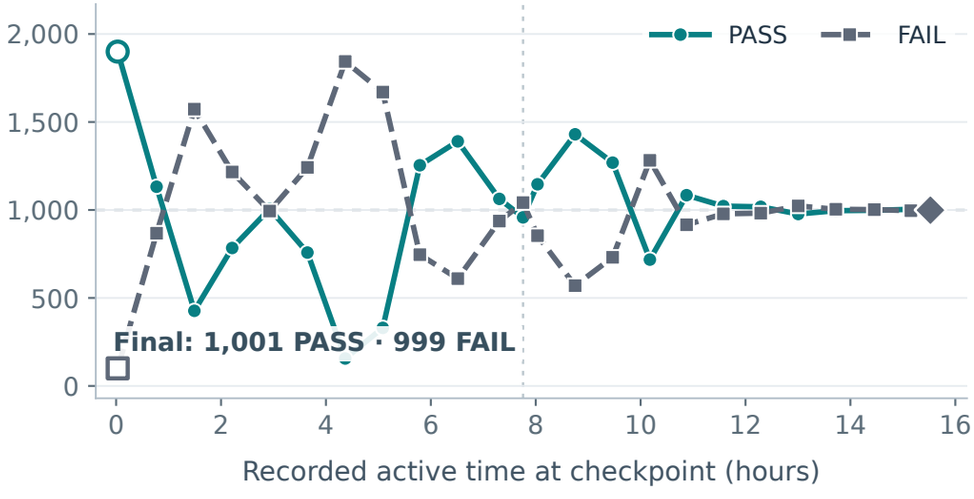
C d PIQA union rejection

100 PIQA examples · judge rejection OR format failure



D Receiver class predictions

Out of 2,000 university examples · PASS + FAIL = 2,000



Open markers: corrected baseline. Diamonds: final update 1076. Gray vertical line: continuation begins at 530. No smoothing.

Dashed references: 50% accuracy, 7.5% observer flags, 8% PIQA rejection, and 1,000 class predictions.

C_I measures observer flagging, not information-transmission accuracy. True university labels: 1,001 PASS and 999 FAIL.

Clock is captured before each evaluation; includes prior retained evaluations/setup, excludes queue/restart downtime and lost work.
